

EDUCATION

SR University – B.Tech in Computer Science and Engineering | Expected: May 2028

Cumulative GPA: 8.7 / 10.00

SR Junior College – Intermediate (IPE) | 2022–2024

SR Prime School – CBSE (Class X) | 2022

SKILLS

- **Programming:** Python, C
- **Data Analytics & Visualization:** Pandas, NumPy, Power BI, Tableau, Seaborn
- **Machine Learning:** Scikit-learn, Data Preprocessing, Model Evaluation
- **Web Development:** HTML, CSS, JavaScript, React
- **Developer Tools:** Git, GitHub, Google Colab, VS Code, StarUML
- **Core Concepts:** Data Structures & Algorithms, DBMS, Dashboard Creation, Data Visualization,

PROJECTS

Study Planner Application

- Built a study planner application using HTML, CSS, and JavaScript to manage schedules and tasks.
- Implemented features for tracking study plans and reminders.
- Designed a simple and user-friendly interface for productivity.

Habit Tracker Application

- Developed a habit tracker website to monitor daily routines and consistency.
- Added features to track habits and visualize progress.
- Created a responsive interface using modern web technologies.

OTT Streaming Consumption Analysis | Power BI

- Developed an interactive dashboard to analyze OTT viewing trends, ratings, subscribers, and genres.
- Created KPIs, charts, and interactive filters for platform and country-wise analysis.
- Used Power BI to transform data into meaningful visual insights.

Memotion – Multimodal Meme Emotion Analysis | Ongoing

- Developing a deep learning model to classify emotions in memes using image and text features.
- Applying image preprocessing and NLP techniques to the Memotion dataset.
- Exploring multimodal learning to combine visual and textual features.

E-Learning Management System | Ongoing

- Developing a web-based E-Learning platform with separate Student and Educator modules for courses, learning materials, assignments, and progress tracking.
- Designing Use Case, Class, Activity, and Sequence diagrams using StarUML to model system requirements and workflows.
- Building a responsive and user-friendly interface with role-based functionality for students and educators.

ACTIVITIES

- Participated in technical workshops / hackathons
- Completed relevant technical certifications
- Presented academic/project work
